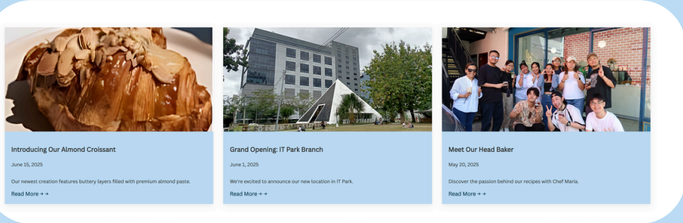
Introduction

Rationale

BACKGROUND

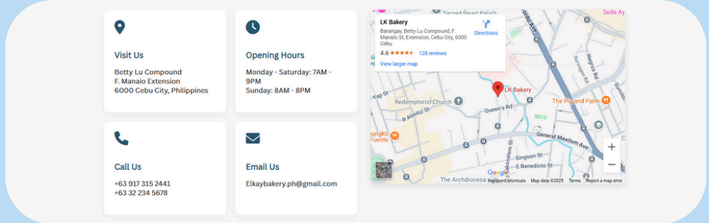
LK Bakery, despite possessing a base of customers, is at a **disadvantage without a dedicated website**. Without a website, they have been at a loss in **reaching potential clients** beyond walk-in customers or messages on Facebook.

BUSINESS OPPORTUNITY



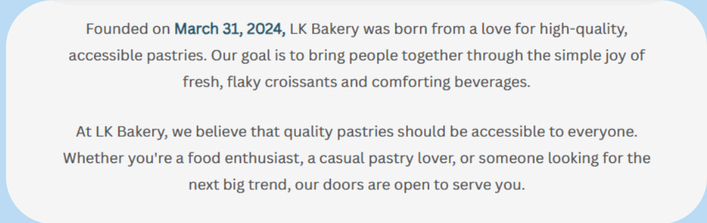
MENU PAGE

Allows customers to view the entire list of items.



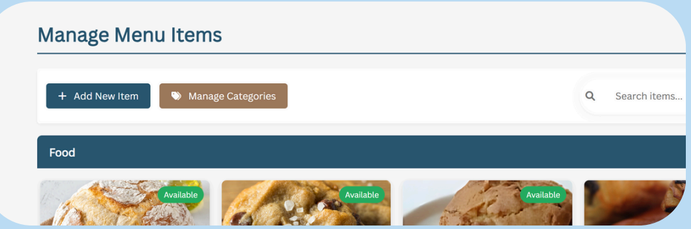
CONTACT PAGE

Allow easy access to information for information for anyone interested.



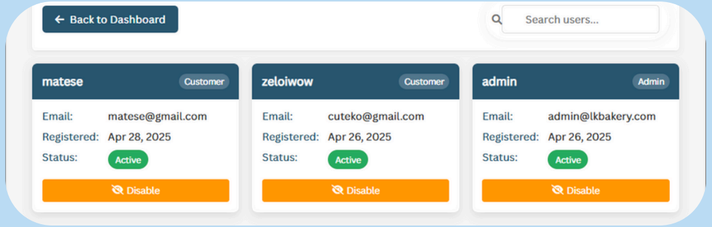
ABOUT PAGE

Helps to set the brand image of the bakery.



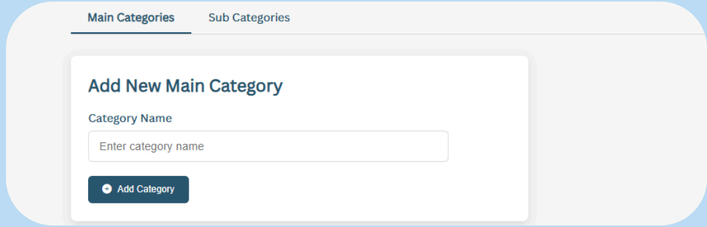
MANAGE MENU PAGE

Use for product catalog management.



MANAGE USERS PAGE

To view and manage user accounts for backend access.



MANAGE CATEGORIES PAGE

To manage and control the main and sub-categories of products.

General Objectives

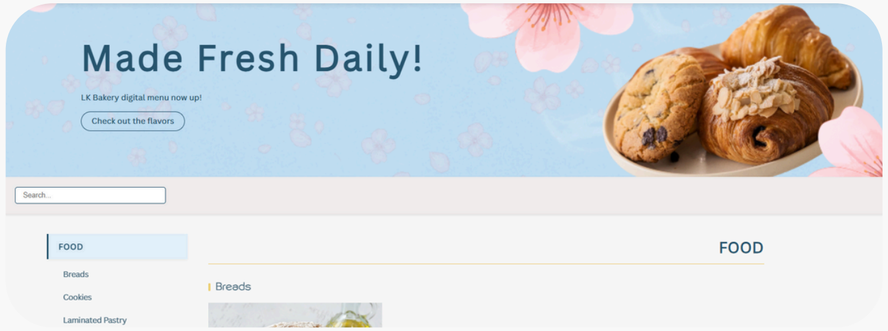
This project aimed to develop a website for LK Bakery in Cebu City, Philippines, over three months, featuring a customer-facing frontend and an administrative-focused backend that will strengthen online brand visibility, streamline operational workflows, and improve customer engagement for menu updates, and user permissions.

Specific Objectives:

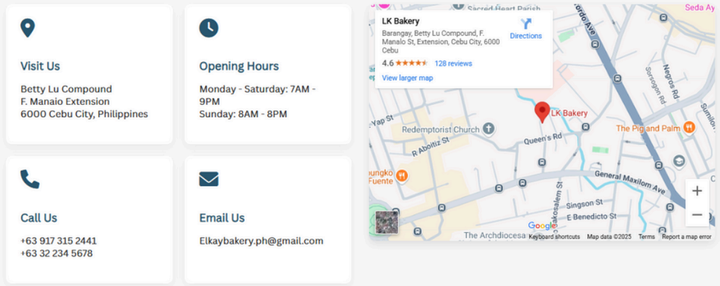
Objectives & Success Criteria

Business Risks

Objectives & Success Criteria

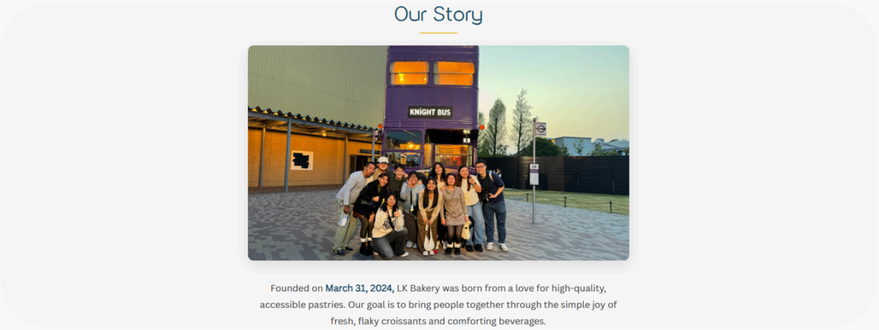


Reduce customer inquiries about menu details via a dynamic **Menu Page**

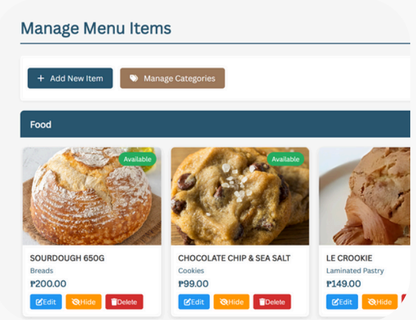


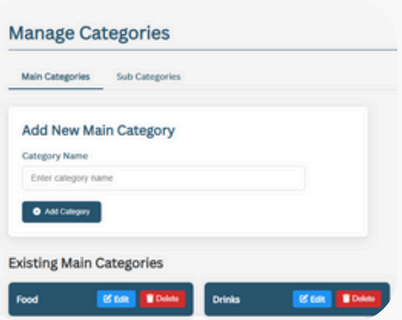
Improve accessibility through the **Contact Page**

Objectives & Success Criteria



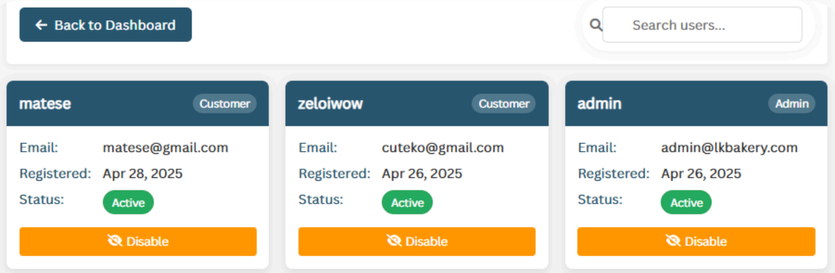
Increase brand loyalty using the **About Page**





Decrease manual administrative tasks via the **Manage Menu** and **Category Pages**

Objectives & Success Criteria



Secure backend operations with **role-based permissions**

Business Risks

Inconsistent menu updates harming customer trust

Data breaches exposing user information or order history

Real-time inventory updates failing, causing overselling of out-of-stock items

Staff resistance to backend tools slows operational efficiency gains

Competitors launching similar features first, reducing market differentiation

Beneficiaries

LK BAKERY

The website establishes a digital presence, broadening the bakery's reach beyond physical customers.

STAFF

Staff members update inventory and via the backend, reducing manual paperwork and errors.

ADMINISTRATORS

Admins oversee backend security, user permissions, and content management.

CUSTOMERS

Customers gain 24/7 access to product details, pricing, and contact options.

MANAGERS

Managers use backend tools to update categories, track analytics, and maintain menu accuracy.

PROJECT DEVELOPMENT TEAM

The team gains hands-on experience in PHP backend, frontend design, and client communication.

Scope & Limitations

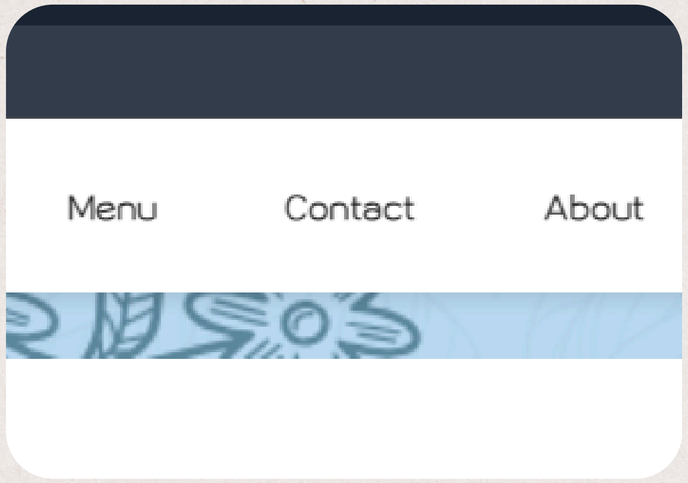
- This website focused on the three main variables: brand visibility, operational efficiency, and customer engagement of LK Bakery over a three-month period in Cebu City, Philippines

SCOPE OF INITIAL RELEASE

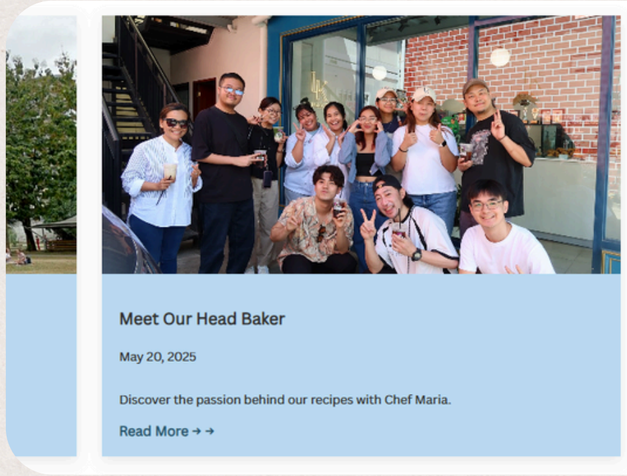
SCOPE OF SUBSEQUENT RELEASES

LIMITATIONS AND EXCLUSIONS

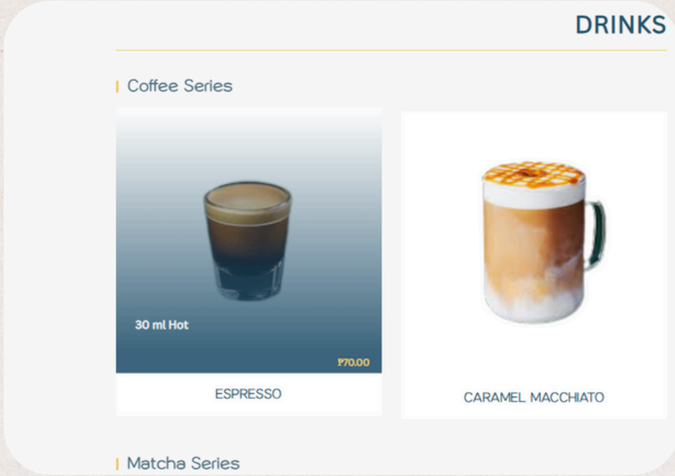
SCOPE OF INITIAL RELEASE



Centralized navigation to Home, About, Menu, and Contact pages

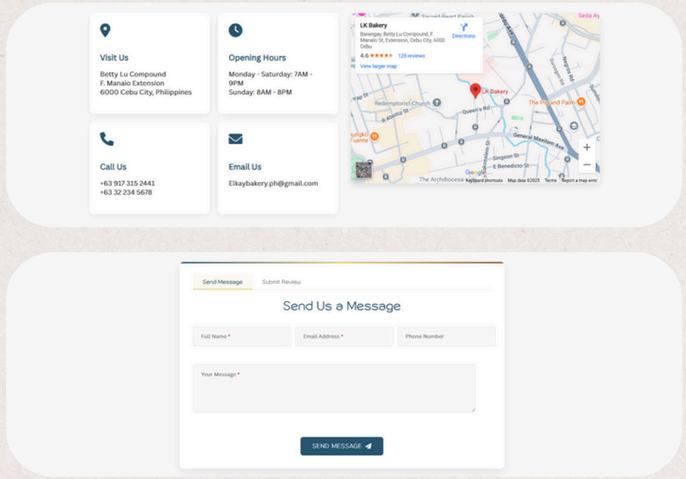


Highlights the bakery's history, goal, and commitment to quality ingredients

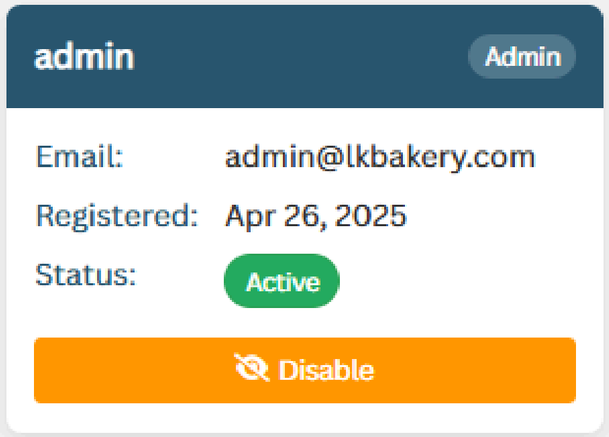


Displays product categories, names, descriptions, prices, and availability

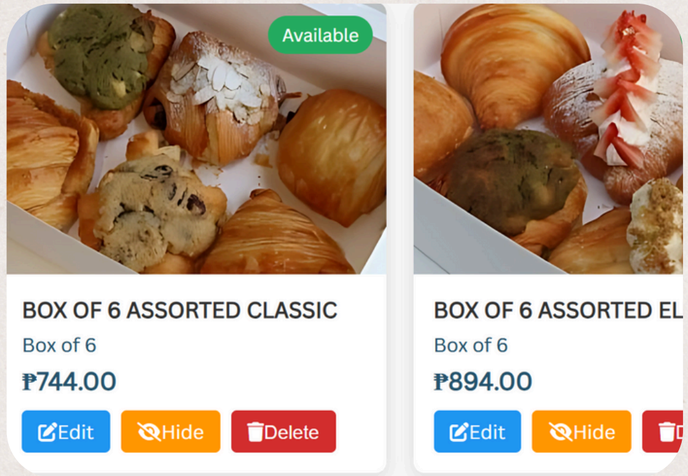
SCOPE OF INITIAL RELEASE



Integrated location map, opening hours, contact details, and a message form for inquiries



Admin, Manager, and Staff roles with predefined permissions



- Manager and Staff can add, edit, or remove items
- Manager and Staff can sort items according to the main and sub categories

SCOPE OF SUBSEQUENT RELEASES

- Tracks customer behavior, sales trends, and campaign performance
- Rewards repeat customers with discounts or exclusive offers
- Staff training portal through an in-app tutorial to reduce resistance to backend tools

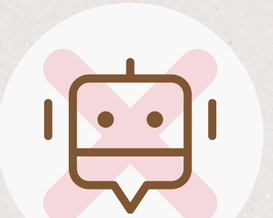
LIMITATIONS AND EXCLUSIONS

Inventory updates require manual input by staff

The system does not support online payment processing

Integration with third-party delivery platforms via APIs is excluded from the initial release

The website does not replace existing order channels and instead serves as a supplementary tool



Advanced features such as AI-driven recommendations or dynamic pricing are excluded
